

Wild Herbivore Hi-Fiber Diet

Mazuri® Wild Herbivore Hi-Fiber Diet is a nutritionally-balanced, starch- and phosphorus-controlled diet designed for wild herbivores, such as giraffe and antelope, managed under human care.

Features and Benefits

- **Nutritionally balanced.**
- **High in fermentation fibers** – Provides energy and promotes healthy rumen.
- **Starch controlled (<4.0%).**
- **Reduced and controlled phosphorus formulation.**
- **Highly palatable** – Accepted by numerous browsers including Giraffe.
- **Contains flaxseed** – Source of Omega-3 Fatty Acids.
- **Naturally preserved with mixed tocopherols.**

Diet developed in collaboration with Disney's Animal Kingdom

Product Form & Packaging

Catalog #0061700 | Pellet | 1/4" x 1/2 - 3/4" | 50 lb. (22.67 kg) net weight paper w/poly bag

Guaranteed Analysis

Crude protein not less than.....	12.00%	Calcium not more than	1.05%
Crude fat not less than	3.00%	Phosphorus not less than.....	0.35%
Crude fiber not less than.....	20.00%	Salt not less than.....	0.45%
Crude fiber not more than	30.00%	Salt not more than	0.95%
Ash not more than	8.50%	Selenium not less than	0.45 ppm
Calcium not less than	0.55%	Selenium not more than	0.54 ppm

Ingredients

Ground Soybean Hulls, Dehulled Soybean Meal, Dried Plain Beet Pulp, Ground Whole Aspen, Cane Molasses, Oat Hulls, Soybean Oil, Brewers Dried Yeast, Ground Flaxseed, Lignin Sulfonate, Dicalcium Phosphate, Salt, Calcium Propionate (a preservative), Sodium Sesquicarbonate, Magnesium Oxide, Calcium Carbonate, Artificial Flavors, DL-Alpha-Tocopherol Acetate (Vitamin E), Riboflavin Supplement, Choline Chloride, Preserved with Mixed Tocopherols, Biotin, Rosemary Extract, Vitamin D3 Supplement, Manganous Oxide, Zinc Oxide, Calcium Pantothenate, Citric Acid (a Preservative), Ferrrous Carbonate, Vitamin A Supplement, Thiamine Mononitrate, Copper Sulfate, Nicotinic Acid, Vitamin B12 Supplement, d-Alpha Tocopheryl Acetate (Vitamin E), Zinc Sulfate, Calcium Iodate, Sodium Selenite, Cobalt Carbonate.

Feeding Directions

- Feed ad libitum, or intake may be limited when free-choice hay or grass pasture is made available.
- Expected intake should be 33 to 50% of the diet, as fed. Offer hay and/or browse at a level to provide the remainder of the diet.
 - Animals generally should be fed 1-3% of body weight per day, although the amount of diet the animal requires will vary according to its species, age, size, life stage, health status, and activity as well as the environmental temperature.
- Always provide plenty of fresh, clean water.
- Thoroughly wash feed and water bowls on a regular basis. It is always good practice to wash hands thoroughly after feeding and/or handling animals.
- This diet is not for human consumption.

Contains more than 15 ppm copper: If using for sheep species, ensure to balance the complete diet for total copper intake.

Caution: Follow label directions: Feeding added selenium at levels in excess of 0.3 ppm in total diet is prohibited.

Storage Conditions

For best results, reseal the bag between uses or store contents of open paper sack in container with sealing lid. Store in a cool (75°F/24°C or colder), dry (approximately 50% RH) location free from rodents and insects. Do not offer moldy or insect-infested feed to animals as it may result in illness, performance loss or death. Freezing will not harm the diet and may extend freshness. Use within 1 year of bag manufacturing or "Best if Used By" date.
