

Moose Maintenance Diet

Mazuri® Moose Maintenance Diet is a concentrated feed designed to approximate the nutrient density of natural foods while providing the nutrition needed to keep non-breeding animals in good condition.

Features and Benefits

- **Starch-reduced** – Approximates the seasonal changes in nutrient density of natural foods.
- **Balanced nutritional levels** – Eliminates the need for additional supplements.
- **Highly palatable** – Animals will readily consume without excessive weight gain.
- **Pellet form** – Easy to feed; minimizes waste.

Product Form & Packaging

Catalog #0005501 | Pellet | 5/32" x 1/2" | 40 lb. (18.14 kg) net weight paper w/poly bag

Guaranteed Analysis

Crude protein not less than	11.00%	Calcium not more than	0.95%
Crude fat not less than	6.00%	Phosphorus not less than	0.35%
Crude fiber not more than	32.00%	Salt not less than	0.75%
Ash not more than	7.00%	Salt not more than	1.25%
Calcium not less than	0.45%	Sodium not more than	0.75%

Ingredients

Ground Aspen, Dried Beet Pulp, Dehydrated Alfalfa Meal, Dehulled Soybean Meal, Soybean Oil, Cane Molasses, Sucrose, Salt, Magnesium Oxide, Dicalcium Phosphate, Calcium Carbonate, Monosodium Phosphate, Potassium Phosphate Dibasic, L-Lysine, L-Ascorbyl-2-Polyphosphate (Stabilized Vitamin C), Inositol, DL-Methionine, Choline Chloride, D-Alpha Tocopheryl Acetate (Form of Vitamin E), Pyridoxine Hydrochloride, Copper Sulfate, Menadione Sodium Bisulfite Complex (source of Vitamin K), Calcium Iodate, Thiamine Mononitrate, Zinc Oxide, Cholecalciferol (Form of Vitamin D3), Folic Acid, Biotin, Calcium Pantothenate, Vitamin A Acetate, Vitamin B-12 Supplement, Riboflavin Supplement, Nicotinic Acid, Cobalt Carbonate, Sodium Selenite.

Feeding Directions

- This diet is designed to be fed as the sole winter diet for moose during the non-breeding season. Feed to animals ad libitum along with appropriate browse and roughage.
 - In late autumn, begin adding the maintenance diet to the animal's breeder diet.
 - By mid-winter, the maintenance diet should be the only source of concentrate offered.
 - Beginning in early summer, commence gradual transition to Mazuri® Moose Breeder Diet until full change over to the breeder concentrate by late summer.
- This diet may not be suitable for animals with higher energy requirements due to growth, gestation or lactation and may not be suitable for geriatric animals. Mazuri® Moose Breeder Diet or Mazuri® Wild Herbivore Plus Diet may be more appropriate in these situations. Mazuri® Wild Herbivore Boost® Supplement may be recommended in situations of severe weight loss or inability to maintain weight.
- Always provide plenty of fresh, clean water.
- Thoroughly wash feed and water bowls on a regular basis. It is always good practice to wash hands thoroughly after feeding and/or handling animals. This diet is not for human consumption.

Caution: Contains more than 15 ppm copper – If using for sheep species ensure to balance the complete diet for total copper intake.

Storage Conditions

For best results, reseal the bag between uses or store contents of open paper sack in container with sealing lid. Store in a cool (75°F/24°C or colder), dry (approximately 50% RH) location free from rodents and insects. Do not offer moldy or insect-infested feed to animals as it may result in illness, performance loss or death. Freezing will not harm the diet and may extend freshness. Use within 1 year of bag manufacturing or "Best if Used By" date.
