

Flamingo Complete Diet

Mazuri® Flamingo Complete Diet can be fed as the staple diet to flamingos and other crustacean-eating birds. As the primary portion of the birds' daily food intake, it is designed to maintain the birds' vibrant plumage color when fed according to directions.

Features and Benefits

- **Floating diet** – Allows for feeding of bird in the water and prevents accumulation on the bottom of the feeding area, limiting water contamination and waste (pellet form only).
- **Ground diet available** – For birds or management conditions that require small particle size.
- **Contains canthaxanthin** – A pigment that supports appropriate plumage color.
- **Nutritionally balanced** – Contains high levels of vitamins and fish proteins.
- **Sustainable fish meal source used.**

Product Form & Packaging

- **Catalog #0005480** | Extruded Particle | 3/16" x 3/8" (4.7 x 9.5 mm) | 50 lb. (22.67 kg) net weight paper w/poly bag
- **Catalog #0064874** | Meal | 50 lb. (22.67 kg) net weight paper w/poly bag

Ingredients

Ground Corn, Wheat Middlings, Ground Wheat, Fish Meal, Porcine Meat and Bone Meal, Brewers Dried Yeast, Dehulled Soybean Meal, Soybean Oil, Calcium Carbonate, Spray Dried Animal Blood Cells, DL-Methionine, L-Lysine, Dicalcium Phosphate, Salt, Pyridoxine Hydrochloride, Choline Chloride, Canthaxanthin (color), Cholecalciferol (Vitamin D3), Vitamin A Acetate, Preserved with Mixed Tocopherols, L-Ascorbyl-2-Polyphosphate (Vitamin C), Manganous Oxide, Citric Acid (a Preservative), Thiamine Mononitrate, Zinc Oxide, Calcium Pantothenate, Riboflavin-5-Phosphate, Magnesium Oxide, Menadione Sodium Bisulfite Complex (Vitamin K), Folic Acid, Nicotinic Acid (Niacin), Inositol, Copper Sulfate, d-Alpha Tocopheryl Acetate (Vitamin E), Vitamin B12 Supplement, Rosemary Extract, Calcium Iodate, Sodium Selenite, Biotin.

Feeding Directions

- Mazuri® Flamingo Complete Diet can be fed as a major part of the birds' daily food intake for growth and maintenance.
- The feed can be scattered directly in shallow water, or it can be fed in a long, shallow trough.
- Feed 23 – 30 g/kg of bodyweight per bird per day including parent-fed chicks. Adult birds will usually eat 150 – 200 grams/day.
- Young birds will start to consume product after parent feeding dwindles.
- Increase amount of product offered if managed birds compete for the feed with other non-collection birds such as starlings and seagulls.
- For breeding flamingos, use Mazuri® Flamingo Breeder Diet.
- Always provide plenty of fresh, clean water.
- Thoroughly wash feed and water bowls on a regular basis. It is always good practice to wash hands thoroughly after feeding and/or handling animals.
- This diet is not for human consumption.

Storage Conditions

For best results, reseal the bag between uses or store contents of open paper sack in container with sealing lid. Store in a cool (75°F/24°C or colder), dry (approximately 50% RH) location free from rodents and insects. Do not offer moldy or insect-infested feed to animals as it may result in illness, performance loss or death. Freezing will not harm the diet and may extend freshness. Use within 1 year of bag manufacturing or "Best if Used By" date.
