

Capybara Diet

Mazuri® Capybara Diet is a timothy-based complete diet formulated to meet the nutritional requirements of capybaras during all life stages.

Features and Benefits

- **Cube-sized pellet** – Appropriate for large, herbivorous rodents.
- **Timothy hay-based pellet** – Lower protein and better mineral balance than alfalfa.
- **Higher fiber** – To help support chewing activity and a healthy digestive system.
- **Contains stabilized vitamin C** – Remains active longer than traditional vitamin C.
- **No artificial colors or flavors.**

Product Form & Packaging

Catalog #303535 | Pellet | 3/8" x 5/8" x 1" (9.5 x 15.8 x 25.4 mm) | 50 lb. (22.67 kg) net weight bag

Guaranteed Analysis

Crude protein not less than.....	14.00%	Moisture not more than	12.00%
Crude fat not less than	3.00%	Ash not more than.....	8.90%
Crude fiber not less than	14.00%	Ascorbic acid not less than	1000 mg/kg
Crude fiber not more than.....	20.00%		

Ingredients

Ground Timothy Hay, Wheat Middlings, Ground Soybean Hulls, Dehulled Soybean Meal, Ground Wheat, Cane Molasses, Ground Oats, Soybean Oil, Calcium Carbonate, Salt, Dicalcium Phosphate, L-Ascorbyl-2-Polyphosphate (Vitamin C), Riboflavin-5-Phosphate, Ferrous Carbonate, Thiamine Mononitrate, Vitamin B12 Supplement, Nicotinic Acid (Niacin), Copper Sulfate, d-Alpha Tocopheryl Acetate (Vitamin E), Cobalt Carbonate, Zinc Sulfate, Calcium Iodate, Sodium Selenite.

Feeding Directions

- Feed daily at approximately 1–2% of the animal's body weight; more may be needed for young or lactating animals.
- The total daily diet should consist of approximately 25–50% pellets and 50–75% hay and grass.
 - The amount of food consumed may vary depending on life stage, reproductive status, environmental conditions, and activity level.
 - Monitor body condition regularly and adjust feeding amounts accordingly.
- Treats or enrichment items, such as produce, may be offered but should not exceed 5% of the total diet.
 - Avoid feeding high-sugar items such as fruit except in very limited amounts, if at all.
- Always provide plenty of fresh, clean water.
- Thoroughly wash feed and water bowls on a regular basis. It is always good practice to wash hands thoroughly after feeding and/or handling animals.
- This diet is not for human consumption.

Storage Conditions

Store in a cool (75°F/24°C or colder), dry (approximately 50% RH), well-ventilated area, protected from rodents and pests. Do not feed moldy or insect-infested feed to animals as it may cause illness, performance loss or death. For best results, reseal the package between uses or store in container with sealing lid. Freezing will not harm the diet and may extend freshness. Use within 1 year of bag manufacturing or "Best if Used By" date.
