Feeding Directions

- Mazuri® Omnivore Diet can be considered the base diet for the wide range of omnivorous species kept by zoos.
 - Does not contain vitamin C, therefore is not suitable for primates, guinea pigs and fish species.
- The amount of diet required by animals will vary according to age, size, life stage, health status, level of activity and the environmental temperature.
- Always provide plenty of fresh, clean water.
- Thoroughly wash feed and water bowls on a regular basis.
- It is always good practice to wash hands thoroughly after feeding and/or handling animals.
- This product is not for human consumption.

Storage Conditions

For best results, reseal the bag between uses or store contents of open paper sack in container with sealing lid. Store in a cool (75°F/24°C or colder), dry (approximately 50% RH) location free from rodents and insects. Do not offer moldy or insect-infested feed to animals as it may result in illness, performance loss or death. Freezing will not harm the diet and may extend freshness. Use within 1 year of bag manufacturing.
