

## Enrichment Gum Arabic

Mazuri® Enrichment Gum Arabic is a dietary enrichment item for non-human primates designed to be made into a solution and used to encourage natural foraging behaviors. Appropriate species include New World primates, lemurs, bush-babies, and other primates for which gums are a part of their wild-type diet.

---

### Features and Benefits

- **Complex mix of polysaccharides and glycoproteins** – Replicates wild-type diet components.
- **Provides opportunity for enrichment.**

---

### Product Form & Packaging

---

### Guaranteed Analysis (dry powder)

Crude protein not less than.....	1.00%	Moisture not more than.....	12.00%
Crude fiber not more than .....	90.00%	Ash not more than .....	5.00%

---

### Ingredients

Gum Arabic, Ascorbic Acid (Vitamin C).

---

### Feeding Directions

NEVER FEED DRY PRODUCT.

- Mazuri® Enrichment Gum Arabic is designed to be a supplement to a nutritionally complete diet.
- Mix powder with water to achieve the desired consistency. Do not feed dry powder.
- Slowly combine by weight 50% room temperature water and 50% Mazuri® dry powder (1 part dry powder: 1 part water). Adjust ratios to desired texture and need.
- Mixed gum can be provided as an enrichment item by pouring into or painting onto objects from which the animal can lick the gum.
  - Intake of up to 10% prepared Gum Arabic is recommended.
- Prepared Gum Arabic should be consumed or discarded within 24 hours or stored no longer than 7 days under refrigeration.
- Always provide plenty of fresh, clean water.
- Thoroughly wash feed and water bowls on a regular basis. It is always good practice to wash hands thoroughly after feeding and/or handling animals.
- This diet is not for human consumption.

---

### Storage Conditions

Mazuri® Enrichment Gum Arabic has a 1-year shelf life in the dry powder form when stored in a dry environment. For best results, tightly affix lid on canister after removal of desired dosage or store contents of open bags in container with sealing lid. Store in a cool (75°F/24°C or colder), dry (approximately 50% RH) location free from rodents and insects. Do not feed moldy or insect-infested feed to animals as it may cause illness, performance loss or death. The mixed product should be stored under refrigeration for no longer than 7 days.
