

Wild Herbivore Plus Diet

Mazuri® Wild Herbivore Plus Diet is a nutritionally-balanced, starch- and phosphorus-controlled diet designed for wild herbivores with increased energy demands.

Features and Benefits

- **Nutritionally balanced**
- **High in fermentation fibers** – Provides energy and supports healthy rumen.
- **Starch controlled (<4.0%).**
- **Reduced phosphorus formulation.**
- **Highly palatable** – Enhanced by beet pulp and molasses addition.
- **Contains flaxseed** – Source of Omega-3 fatty acids.
- **Naturally preserved with mixed tocopherols.**

Diet developed in collaboration
with Disney's Animal Kingdom

Product Form & Packaging

Catalog #3001790-916 | Pellet | 5/32" x 3/4" | 50 lb. (22.67 kg) net weigh paper w/poly bag

Guaranteed Analysis

Crude protein not less than.....	13.00%	Phosphorus not less than.....	0.50%
Crude fat not less than.....	8.00%	Salt not less than.....	0.05%
Crude fiber not more than	22.00%	Salt not more than	0.55%
Moisture not more than.....	12.00%	Sodium not less than.....	0.28%
Ash not more than	9.00%	Sodium not more than	0.78%
Calcium not less than	0.75%	Selenium not less than.....	0.40 ppm
Calcium not more than.....	1.25%	Selenium not more than	0.48 ppm

Ingredients

Ground Soybean Hulls, Dehulled Soybean Meal, Dried Plain Beet Pulp, Cane Molasses, Oat Hulls, Ground Whole Aspen, Soybean Oil, Lignin Sulfonate, Dicalcium Phosphate, Ground Flaxseed, Yeast Culture, Sodium Sesquicarbonate, Calcium Propionate (a Preservative), Salt, Magnesium Oxide, Calcium Carbonate, Artificial Apple Flavor, dl-Alpha Tocopheryl Acetate (Vitamin E), Riboflavin-5-Phosphate, Sugar, Manganous Oxide, Choline Chloride, Preserved with Mixed Tocopherols, Zinc Oxide, Cholecalciferol (Vitamin D3), Ferrous Carbonate, Calcium Pantothenate, Vitamin A Acetate, Citric Acid (a Preservative), Copper Sulfate, Thiamine Mononitrate, Nicotinic Acid (Niacin), Vitamin B12 Supplement, Zinc Sulfate, d-Alpha Tocopheryl Acetate (Vitamin E), Calcium Iodate, Rosemary Extract, Cobalt Carbonate, Sodium Selenite.

Feeding Directions

- Feed ad libitum or intake may be limited when free-choice hay or grass pasture is made available.
- Expected intake should be 33 to 50% of the diet, as fed. Offer hay and/or browse at a level to provide the remainder of the diet.
 - Animals generally should be fed 1 – 3% of body weight per day, although the amount of diet the animal requires will vary according to its species, age, size, life stage, health status, and activity of the animal and the environmental temperature.
- Always provide plenty of fresh, clean water.
- Thoroughly wash feed and water bowls on a regular basis. It is always good practice to wash hands thoroughly after feeding and/or handling animals.
- This diet is not for human consumption.

Contains more than 15 ppm copper – If using for sheep species, ensure to balance the complete diet for total copper intake.

Caution: Follow label directions: Feeding added selenium at levels in excess of 0.3 ppm in total diet is prohibited.

Storage Conditions

For best results, reseal the bag between uses or store contents of open paper sack in container with sealing lid. Store in a cool (75°F/24°C or colder), dry (approximately 50% RH) location free from rodents and insects. Do not offer moldy or insect-infested feed to animals as it may result in illness, performance loss or death. Freezing will not harm the diet and may extend freshness. Use within 1 year of bag manufacturing or "Best if Used By" date.
