

Exotic LS Hoofstock Diet

Mazuri® Exotic LS Hoofstock Diet is a nutritionally balanced, starch- and phosphorus-controlled diet designed for exotic herbivores managed under human care. Locally sourced fiber alternates such as oat hulls, soybean hulls, and rice hulls are incorporated to meet fiber specifications and utilize locally available ingredients.

Features and Benefits

- **Nutritionally balanced, starch controlled** – Less than 9% starch.
- **High in fermentation fibers** – Provides energy and promotes a healthy rumen.
- Contains added **vitamin E** and **highly absorbable trace minerals**.
- **Lower protein** – Helps control hoof growth.
- **Available in larger, cube-sized pellet as well (5V0R).**

Product Form & Packaging

Pellet | 5/32" x 1/2" – 3/4"

- **Catalog #3002726-906** | 50 lb. (22.67 kg) net weight bag
- **Catalog #3002726-201** | Bulk | Regionally available

Guaranteed Analysis

Crude protein not less than.....	12.00%	Calcium not more than	1.35%
Crude fat not less than	3.00%	Phosphorus not less than.....	0.50%
Crude fiber not more than	33.00%	Salt not less than.....	0.70%
Calcium not less than	0.85%	Salt not more than	1.20%

Ingredients

Note: Review your feed tag for specific ingredient listings, which - depending on your region – may include locally-sourced fiber sources.

Contact your Mazuri® representative for details.

Ground Soybean Hulls, Wheat Middlings, Dehydrated Alfalfa Meal, Oat Hulls, Cane Molasses, Dehulled Soybean Meal, Calcium Carbonate, Salt, Soybean Oil, Lignin Sulfonate, Monocalcium Phosphate, Dicalcium Phosphate, Magnesium Sulfate, Potassium Sulfate, Choline Chloride, DL-Alpha Tocopheryl Acetate (Vitamin E), Cholecalciferol (Vitamin D3), Zinc Amino Acid Complex, Calcium Pantothenate, Manganese Amino Acid Complex, Vitamin A Acetate, Copper Amino Acid Complex, Zinc Sulfate, Cobalt Glucoheptonate, Copper Sulfate, Thiamine Mononitrate, Zinc Oxide, Riboflavin-5-Phosphate, Vitamin B12 Supplement, Nicotinic Acid, Manganous Oxide, Ferrous Carbonate, Sodium Selenite, Calcium Iodate, Biotin, Cobalt Carbonate.

Feeding Directions

- May be fed ad libitum or offer grass, hay, and/or browse at a level to provide 25% to 50% of daily feed intake.
- Animals generally should be fed 1 – 3% of body weight per day.
 - The amount of diet the animal requires will vary according to its species, age, size, life stage, health status, and activity level as well as management and the environmental temperature.
- Recommended for exotic ruminants over 50 kg. Ruminants under 50 kg may benefit from Mazuri® Wild Herbivore Plus Diet, which is more energy dense.
- Always provide plenty of fresh, clean water.
- Thoroughly wash feed and water bowls on a regular basis. It is always good practice to wash hands thoroughly after feeding and/or handling animals.
- This diet is not for human consumption.

Caution: Contains more than 15 ppm copper – If using for sheep species, ensure to balance the complete diet for total copper intake.

Storage Conditions

For best results, reseal the bag between uses or store contents of open paper sack in container with sealing lid. Store in a cool (75°F/24°C or colder), dry (approximately 50% RH) location free from rodents and insects. Do not offer moldy or insect-infested feed to animals as it may result in illness, performance loss or death. Freezing will not harm the diet and may extend freshness. Use within 1 year of bag manufacturing or "Best if Used By" date.
