

Primate Maintenance Biscuit

Mazuri® Primate Maintenance Biscuit is formulated for a variety of primates. The diet is especially useful in feeding mature and overweight primates.

Features and Benefits

- **Designed to be fed with supplementation** – Allows for natural feeding behaviors by the addition of species-appropriate food items.
- **Meets NRC recommendations for all nutrients** – Except protein, sodium, and chloride when fed at 50% of the diet.
- **High fiber** – Contains multiple sources of soluble and insoluble fiber.
- **No added wheat product** – May be appropriate for animals with wheat sensitivity.
- **Contains bioavailable forms of vitamin E and vitamin C.**
- **Contains flaxseed** – Source of Omega-3 fatty acids.
- **Contains taurine.**

Product Form & Packaging

Catalog #0040996 | Extruded Particle | 1" x 1 ¼" x 2" Biscuit | 25 lb. (11.33 kg) net weight paper sack

Guaranteed Analysis

Crude protein not less than	15.00%	Moisture not more than	12.00%
Crude fat not less than	4.00%	Ash not more than	8.00%
Crude fiber not more than	10.00%		

Ingredients

Ground Corn, Ground Soybean Hulls, Dehulled Soybean Meal, Ground Oats, Corn Protein Meal, Fructose, Sugar, Dicalcium Phosphate, Soybean Oil, Dehydrated Alfalfa Meal, Dried Plain Beet Pulp, Calcium Carbonate, Ground Flaxseed, Dried Apple Pomace, Brewers Dried Yeast, Salt, Natural Flavor, L-Ascorbyl-2-Polyphosphate (Vitamin C), Pyridoxine Hydrochloride, Taurine, Choline Chloride, DL-Methionine, L-Lysine, Zinc Proteinate, Folic Acid, Cholecalciferol T (Vitamin D3), Calcium Pantothenate, Manganese Proteinate, Vitamin A Acetate, Copper Proteinate, Menadione Sodium Bisulfite Complex (Vitamin K), Preserved with Mixed Tocopherols, Thiamine Mononitrate, Iron Proteinate, Vitamin B12 Supplement, Riboflavin-5-Phosphate, Nicotinic Acid (Niacin), Citric Acid (a Preservative), d-Alpha Tocopheryl Acetate (Vitamin E), Cobalt Proteinate, Ethylenediamine Dihydroiodide, Rosemary Extract, Sodium Selenite, Biotin.

Feeding Directions

- Mazuri® Primate Diets are designed to be an essential part of a total primate feeding system and may be used in conjunction with all other Mazuri® primate products.
- Primates generally consume 2% to 4% of their body weight in food each day on a dry matter basis (i.e., a 50 lb. animal will eat 1 to 2 lbs. of food per day, on a dry matter basis).
 - Mazuri® primate diets can be supplemented with fresh vegetables and fruit if this is desired to provide variety in the diet, as long as the dry matter of these items does not exceed 50% of the dry matter consumption. Using typical produce and non-toxic browse, a feeding program on an "as fed" basis might consist of 60% produce/browse and 40% Mazuri® primate products (i.e., a diet may be 6 lb. of produce/browse plus 4 lb. of one or a mix of Mazuri® primate products).
- The amount of diet the animal requires will vary according to its age, size, life stage, health status, and activity of the animal as well as the environmental temperature.
 - Adjust daily feed intake based on the health status, body condition, and nutrient level desired to meet the needs of your primates.
 - Diet may be soaked to soften the biscuits for neonates or animals that have difficulty chewing.
- Primates require ascorbic acid (vitamin C) in their daily diet. Mazuri® Primate Diets contain a stabilized form of vitamin C that is stable under appropriate storage conditions for at least 1 year from the date of manufacturing printed on the bag.
- Always provide plenty of fresh, clean water. Thoroughly wash feed and water bowls on a regular basis. It is always good practice to wash hands thoroughly after feeding and/or handling animals.
- This diet is not for human consumption.

Storage Conditions

For best results, reseal the bag between uses or store contents of open paper sack in container with sealing lid. Store in a cool (75°F/24°C or colder), dry (approximately 50% RH) location free from rodents and insects. Do not offer moldy or insect-infested feed to animals as it may result in illness, performance loss or death. Freezing will not harm the diet and may extend freshness. Use within 1 year of bag manufacturing or "Best if Used By" date.
