

Bearded Dragon Diet

Mazuri® Bearded Dragon Diet is designed for insect-eating reptiles including bearded dragons, water dragons, and geckos. It is formulated to simulate the high-protein, high-fiber diet of insectivorous animals.

Features and Benefits

- **Formulated to be high in fiber and protein** to represent the insect portion of the diet.
- **Contains omega-3 fatty acids and a natural source of vitamin E.**
- **No added artificial flavors.**

Product Form & Packaging

Extruded Particle | 1/8" round particle

- **Catalog #0052502** | 8 oz. (226 g) net weight resealable poly bag
- **Catalog #0052503** | Case: 12 x 8 oz bags resealable poly bags

Guaranteed Analysis

Ingredients

Chicken Meal, Ground Soybean Hulls, Ground Wheat, Dehulled Soybean Meal, Rice Flour, Poultry Fat Preserved with Mixed Tocopherols, Ground Whole Aspen, Cellulose, Dried Plain Beet Pulp, Brewers Dried Yeast, Dried Apple Pomace, Wheat Germ, Dried Whey, Fish Meal, Natural Poultry Flavor, Soybean Oil, Lecithin, Fish Oil, Phosphoric Acid, Calcium Propionate (a Preservative), Salt, DL-Methionine, Taurine, Choline Chloride, Lactose, L-Ascorbyl-2-Polyphosphate (Vitamin C), Pyridoxine Hydrochloride, Thiamine Mononitrate, Menadione Sodium Bisulfite Complex (Vitamin K), Manganous Oxide, D-Alpha Tocopheryl Acetate (Vitamin E), Preserved with Mixed Tocopherols, Inositol, Cholecalciferol (Vitamin D3), Rosemary Extract, Vitamin B12 Supplement, Folic Acid, Citric Acid (a Preservative), Vitamin A Acetate, Riboflavin-5-Phosphate, Calcium Carbonate, Calcium Pantothenate, Nicotinic Acid, Zinc Oxide, Ferrous Carbonate, Calcium Iodate, Ferrous Sulfate, Copper Sulfate, Zinc Sulfate, Sodium Selenite, Biotin, Cobalt Carbonate.

Feeding Directions

- Bearded Dragon Diet should make up at least 50% of your animal's intake.
- Free feed juvenile and adult insect-eating animals. Adult bearded dragons will typically eat 1 tablespoon (6-8 g) per day. Feed intake will vary due to environmental temperature, activity, and life stage.
- Initially, soaking Bearded Dragon Diet in water (2 parts water:1 part dry diet) may help transition animals that are used to soft/moist diets.
- After 1-2 weeks on soaked diet, move to 1 part water:1 part dry diet, and 1-2 weeks later, offer dry diet.
- Supplemental food items like insects, produce, and meat should be provided to your reptile.
- Always provide plenty of fresh, clean water.
- Thoroughly wash feed and water bowls on a regular basis. It is always good practice to wash hands thoroughly after feeding and/or handling pets.
- This diet is not for human consumption.

Storage Conditions

For best results, reseal the bag between uses or store contents of open paper sack in container with sealing lid. Store in a cool (75°F/24°C or colder), dry (approximately 50% RH) location free from rodents and insects. Do not offer moldy or insect-infested feed to animals as it may result in illness, performance loss or death. Freezing will not harm the diet and may extend freshness. Use within 1 year of bag manufacturing or "Best if Used By" date.
