

## ADF 16 Herbivore Diet

Mazuri® ADF 16 Herbivore Diet is based on formulation designed by Dr. Duane Ullrey (1987), for use in the feeding of herbivores. Locally sourced fiber sources are incorporated to meet fiber specifications and utilize locally available ingredients.

### Features and Benefits

- **Nutritionally balanced** – May be used to complement hay or pasture.
- **High-energy formula** – Meets increased needs (e.g. reproduction, cold weather).
- **Available in larger, cube size as well (5M40).**

### Product Form & Packaging

Catalog #0009837 | Pellet | 5/32" x 1/2" | 50 lb. (22.67 kg) net weight paper w/poly bag

### Guaranteed Analysis

Crude protein not less than .....	17.00%	Calcium not less than.....	0.60%
Crude fat not less than.....	3.00%	Calcium not more than .....	1.10%
Crude fiber not more than .....	15.00%	Phosphorus not less than .....	0.65%
Acid Detergent Fiber not more than.....	17.00%	Salt not less than.....	0.75%
Ash not more than .....	8.00%	Salt not more than.....	1.25%

### Ingredients

**Note: Review your feed tag for specific ingredient listings, which - depending on your region – may include locally-sourced fiber sources.**

**Contact your Mazuri® representative for details.**

Dehydrated Alfalfa Meal, Wheat Middlings, Ground Corn, Dehulled Soybean Meal, Cane Molasses, Soybean Oil, Salt, Ground Soybean Hulls, Calcium Propionate (a Preservative), Monocalcium Phosphate, Dicalcium Phosphate, Vitamin E Supplement, L-Lysine, Calcium Carbonate, Cholecalciferol (Vitamin D3), Manganous Oxide, Zinc Oxide, Calcium Pantothenate, Ferrous Carbonate, Lignin Sulfonate, Choline Chloride, Vitamin A Acetate, Thiamine Mononitrate, Copper Sulfate, Nicotinic Acid, Riboflavin-5-Phosphate, Vitamin B12 Supplement, Zinc Sulfate, Calcium Iodate Cobalt Carbonate, Sodium Selenite, Biotin.

### Feeding Directions

- Expected intake should be 25% of the feed intake of the animal, as fed. Offer hay and/or browse at a level to provide the remainder of the diet.
- Animals generally should be fed 1-3% of body weight per day.
  - The amount of diet the animal requires will vary according to its species, age, size, life stage, health status, and activity of the animal as well as the environmental temperature.
  - This product is not intended for, nor recommended for, browsing herbivores. Research suggests that browsing herbivores such as giraffe, moose, reindeer, and many small ruminants should be maintained on low starch diets. This product contains appreciable quantities of starch, and thus is not recommended for browsing herbivores. Option for browsing animals include Mazuri® Wild Herbivore High Fiber Diet pellets or cubes and Mazuri® Wild Herbivore Plus Diet.
- Always provide plenty of fresh, clean water.
- Thoroughly wash feed and water bowls on a regular basis. It is always good practice to wash hands thoroughly after feeding and/or handling animals.
- This diet is not for human consumption.

**Caution: Contains more than 15 ppm copper – If using for sheep species, ensure to balance the complete diet for total copper intake.**

### Storage Conditions

For best results, reseal the bag between uses or store contents of open paper sack in container with sealing lid. Store in a cool (75°F/24°C or colder), dry (approximately 50% RH) location free from rodents and insects. Do not offer moldy or insect-infested feed to animals as it may result in illness, performance loss or death. Freezing will not harm the diet and may extend freshness. Use within 1 year of bag manufacturing or "Best if Used By" date.
